

## Deer Management Assistance Program

*A partnership for healthy deer and healthy habitat*

### **Give deer and other wildlife what they need — improve your habitat with DMAP!**

The Deer Management Assistance Program provides landowners with wildlife habitat management resources for properties of any size. Three levels of enrollment place a wide range of benefits at your fingertips, ranging from hands-on workshops and informational resources to property-specific management plans.

For Level 2 or 3 enrollment (160 acres or more), be sure to apply before March 1 to be eligible for a site visit with a wildlife biologist and a forester this year. Enroll with your neighbor as a group cooperative to receive benefits at a higher level! Not quite sure if DMAP is right for you? Join us for a DMAP chat Feb. 11 at noon. Visit [dnr.wi.gov](http://dnr.wi.gov), keyword “[chat](#)” to participate or view the chat at a later time.

Learn more and apply at [dnr.wi.gov](http://dnr.wi.gov), keyword “[DMAP](#).”
