

Sauk County Reedsburg, sect.9. Cropland map.

The cropland area is 12 acres.

The setback from the small private lots to the east is 40 ft.

Normal field operations will occur 7am to 9pm. With the main planting operation during early May and harvest during October or November.

Corn and soybeans are planned for this field using a no-till planting operation.

Normal fertilizer and herbicides may be applied during the growing season according to a nutrient management plan developed by the Sauk County Land Conservation Department.
