Project Description:	<p>In 2018, Sauk County constructed a 5-mile paved biking/hiking trail (Great Sauk State Trail, GSST) on the former railroad line that runs through the former Badger Army Ammunition Plant as a continuation of the 6-mile trail constructed the previous year on the same rail line that connects the villages of Sauk City and Prairie du Sac. In summer 2020, Sauk Prairie Conservation Alliance received a small grant from Sauk County to plan a native prairie planting on the GSST right-of-way to complement the prairie plantings being planned and undertaken by adjoining landowners at Badger, including Wisconsin Department of Natural Resources, USDA Dairy Forage Research Center and Ho-Chunk Nation. The first step (summer/fall 2020) is simply to inventory what is on the ROW, including soil sampling, identifying existing vegetation and noting potential infrastructure/hazards. From that inventory, a map of existing vegetation & soils will be developed, and restoration opportunities will be identified. The entire data set and maps will comprise a preliminary restoration plan for the ROW at Badger (October 2020). Once one or more preliminary prairie restoration sites are identified, we would begin invasive plant control (mechanical cutting of brush with hand tools, herbicide application—probably a DNR-approved glyphosate mixture) to prepare the approximately 5 to 10-acre site (early spring-fall, 2021). If invasive species are adequately controlled, we would plan a planting in late fall 2021. Depending on soil conditions, the restoration site may be tilled lightly to open soil for seeding.</p> <p>Note: A restoration plan with special focus upon the Great Sauk Trail corridor was written by Jeb Barzen – Private Lands Conservation, LLC and is available upon request.</p>
