All awards funded under this Grant Announcement must comply with evolving state and national standards pertaining to NextGen9-1-1 systems as those standards are finalized and released statewide or at the national level. Please be advised that if the Grantee is deemed to be out of compliance with statute (Wis. Stat. 256.35) and DMA NGSP.1 NG9-1-1 GIS Grants Policy or any grant conditions or requirements, current grant funds may be held or de-obligated, and the approval of future grant funds may be impacted.

2. 9-1-1 Fee Diversion

NG9-1-1 GIS Grant Program Application Form Track 2

Section 2: Grant Projects

A . Provide a narrative on planned/anticipated projects that the quarterly payment would support. The funds received after quarterly benchmarks are met do not need to be used in that quarter and can be budgeted for future expenses. All funds received must go towards supporting 9-1-1 services.

- The funds would support continual maintenance of required, strongly recommended, or recommended data layers from the Wisconsin NG9-1-1 GIS Data Standards and Best Practices.
- The following activities are rolled into the quarterly maintenance; the management of road centerlines, address points, building footprints, service boundaries, PSAP & Provisioning boundary, city and village coordination for new and retired addresses, improvements to data extraction and preparation for data loads, review of reports and critical errors, collection & processing of surrounding county data, corrections to warnings, MSAG/ALI synchronization (ALI extracts), & NG911 GIS Grant Management. We will continue to work closely with our PSAP to provide any GIS layer they need to improve call support.
- WROC leaf-off orthoimagery to support NG911 mapping (including building footprint additions and retirements, road centerline alignment and trail updates)

B. Will your agency be able to meet the benchmarks each quarter? If not, what additional work is needed to reach the benchmarks? Please include a timeline outlining the progress.

Yes

C. Please describe the current status of your ALI/MSAG datasets as they compare to your NG911 GIS data. Would you like assistance from OEC in improving your ALI to Road Centerline GIS layer comparison match rate? If so, please describe what assistance you would like to receive.

I believe we are in good shape and will continue to improve this, so we are in a position to meet this requirement in the future. Two of our GIS staff are MSAG coordinators. According to AT&T in 2024, we were at a 98% match rate between ALI and the roadcenterlines. After our 1st successful delivery to GIS Data Hub the ALI to roadcenterline dropped to 93.4%. As of November 2025, we were down to 1297 ALI warnings and 1265 MSAG warnings. It would be very helpful if DMA could acquire a statewide ALI database extract for comparison in GIS Data Hub.
