Tested Negative

No

Have you had ‘close contact’ with someone who has symptoms of COVID-19?

Yes

Yes

In the past 14 days, have you traveled to a ‘COVID Resurgence Area?’

No

QUARANTINE PROTOCOL 1

If you are NOT able to completely separate from this person who has symptoms of, or was diagnosed with COVID-19, you can be released from quarantine 14 days after the sick person is well.

QUARANTINE PROTOCOL 2

If you are able to completely separate from the person who has symptoms of, or was diagnosed with COVID-19, you can be released from quarantine 14 days after your last contact with the sick person.

QUARANTINE PROTOCOL 3

You should be in quarantine for 14 days following the day AFTER your return to Sauk County.

SELF-ISOLATION PROTOCOL 1

Even though you have tested negative, it is possible that you still have COVID-19. This happens when the level of virus present at your sample site (e.g. nose) isn’t high enough. For this reason, you should be in home isolation. Isolation means you cannot leave your home, and you should separate yourself from household members in every way possible. You can be discharged from isolation once you have tested negative and you have had no fever and a substantial improvement in all symptoms without medications for 24 hours. If your symptoms become worse, call your provider for testing. NOTE: if you were exposed or have travel history and were quarantined, you must complete your full 14-day quarantine.

SELF-ISOLATION PROTOCOL 2

You should be in home isolation. Isolation means you cannot leave your home, and should separate yourself from household members in every way possible. If you are not tested or you test positive, you should remain in isolation until the following conditions are met:
• It has been ten (10) days since symptoms began, AND
• You have had no fever without use of medication for 72 hours or more, AND
• You have had significant improvement in all other symptoms WITHOUT medication for 72 hours +.
NOTE: If you were exposed or have travel history and were quarantined, you must complete your full 14-day quarantine.

SELF-OBSERVATION PROTOCOL

You may continue normal social distancing and Safer at Home activities. Remember that we have community-spread of COVID-19 in Sauk County, and you should be monitoring yourself for symptoms daily. If you develop symptoms, immediately isolate yourself at home and call your provider to be tested. Call ahead for medical care if your symptoms become worse.

NOTE: Quarantine means that you remain at home and do not go into the community. Others should drop off items you need if at all possible. Monitor yourself for symptoms, twice daily. If you develop symptoms, isolate yourself. If symptoms are severe, call ahead to seek medical care.
