

TUBERCULOSIS

WHAT YOU NEED TO KNOW AND WHY IT MATTERS

Sauk County - Partners in Health

A partnership between Sauk County Health Department and Edgewood College nursing students to provide education, TB screenings and possibly immunizations for dairy farm workers.

Why It Matters

28.2 %

of all people reporting TB were Hispanics/Latinos in the US in 2017.

For Your Dairy

Some TB can spread between cattle and humans

TB can spread easily, even through air

An infected cattle herd can be costly for the farm

For Your Workers

It's serious - TB was once a leading cause of death in the US

TB is challenging to diagnose, treat, and control

There are many barriers to screening and treatment of TB

Sauk County Health Department and Edgewood College

A partnership dedicated to the health and safety of you and your workers
