

## Clarifying Questions – Responses

**1. Is the goal of the project to get off-peak season parking counts?**

No, the goal is to identify areas lacking sufficient parking based on seasonal uses. In other words, is there a season(s) or recreational use(s) that requires more parking space? The other goal is to identify if any proposed additional recreational opportunities or expansion of existing opportunities would necessitate additional parking.

**a. Is there a desired number or frequency of counts the consultant should include in the proposal?**

We expect the consultant to use existing car count data. An inventory of existing parking should be conducted along with estimations for proposed uses and proposed effect on parking based on use.

**b. Is data available or desired for peak use?**

The park has a car counter on White Mound Dr that has been in operation since July 2018.

**2. What, if any, additional recreation opportunities are proposed or desired to add to the park?**

The County is proposing the addition of the following activities: fat tire or mountain bike trails, horse campground, rustic campsites, additional campground, and the expansion of hiking and horse trails.

**3. Is data from the public outreach conducted for the ongoing master plan available for the consultant to review?**

Yes, the data will be made available to the chosen consultant along with a copy of the draft master plan.

**4. Should the consultant provide cost for acquisition meetings with property owners?**

It may be included as a secondary cost. This may not be necessary as a Land Resources and Environment staff member would be required at all meetings.

**5. Has a project budget been identified?**

The 2021 budget includes \$25,000 to complete this study.

**6. Given that the timing of this project is largely within off-peak seasons (October-March), are past counts of parked vehicles during peak use days available to be used for analysis instead of collecting new ones this fall?**

The Park has a car counter on White Mound Dr. that has been in operation since July 2018.

**7. Can you share your budget for the project?**

The 2021 budget includes \$25,000 to complete this study.

**8. Can you share the public input and recreational use statistics gathered to date by the department?**

Yes, the data will be made available to the chosen consultant along with a copy of the draft master plan.
